

# Agile Project Management Certification Series: Certified Scrum Master

Agile Project Management Certification Series:

This workshop provides instruction on developing the key competencies necessary to take on the Scrum Master role, leading or participating in an Agile project management/product development team. The session covers the Scrum framework as defined by the Scrum Guide, covering the Learning Objectives established by the Scrum Alliance, the most widely recognized Agile certification body in the world. Best practices from other Agile approaches are also introduced, assuring the learner has both broad awareness and fundamental competency to apply the learning to their work. Learning takes place through lecture, group discussion/exercises, case studies and Q&A. This workshop will cover materials and necessary certification fee to pass the Scrum Alliance Certified Scrum Master (CSM) exam on Day 3.

## Who Should Attend?

Project managers, product owners, team leads or team member who manage or participate in Agile / Scrum projects.

## Objectives

This course satisfies all of the Learning Objectives identified by the Scrum Alliance required to become a Certified Scrum Master, including the prerequisite Scrum Foundations Learning Objectives.

By means of lectures, group discussions, and individual and group exercises you will:

- Be able to define Agile, Scrum, and describe their relationship
- Understand the values, roles, artifacts, and events central to the Scrum Framework
- Be aware of the core competencies required to be a good ScrumMaster
- Be positioned to perform as a ScrumMaster to support your organization
- Improve your project management/product management skills
- Meet the requirements to sit for the Certified Scrum Master exam
