

Agile Project Management Certification Series: Certified Scrum Product Owner

Agile Project Management Certification Series:

This workshop provides instructions on the key areas necessary to take on the role of Product Owner in a Scrum Team. The session covers the Scrum framework as defined by Scrum Alliance with particular emphasis on the roles and responsibilities of the Product Owner including: product visioning, establishing the product backlog, backlog management and planning, and other activities and practices that help the Scrum Team achieve tangible business value in the shortest possible timeframe. Through a combination of lecture, group discussion, and group and individual exercises participants will leave the course with a solid foundation as a Product Owner, positioned to help their organizations achieve more business value through the application of the Scrum Framework. This workshop covers materials and necessary certification fee to complete the requirements to become a Scrum Alliance Certified Scrum Product Owner.

Who Should Attend?

CEOs, Project Portfolio/Program Managers, Product Managers, Project Managers, and others with business responsibility for or an interest in applying agile principles and practices to achieve high-value business-driven results.

Objectives

By means of lectures, group discussions, and individual and group exercises you will:

- Understand the values and principles of Agile methodologies
- Understand the Scrum Framework including the values, roles, artifacts, and ceremonies that comprise the framework and how to use the framework to maximize business value
- Improve your product and project deliver skills; understand how to lead Scrum Teams in value-based, business-focused delivery of a product or project
- Meet the requirements to become a Scrum Alliance Certified Scrum Product Owner
